Guideline Source: <i>(Examples: ADA, USPSTF, HTW, NHLBI, etc)</i>	ADA 2014 Guidelines Executive Summary: Standards of Medical Care in Diabetes-2014 http://care.diabetesjournals.org/			
Guideline Original or Revision Date:	January, 2014 (Revision Date) American Diabetes Association			
QCEC Approval Date	03/10/2014			
Guideline Summary and link to guideline <i>(Summarize guideline for Memo and link to full guideline + note on Updates</i>	Only 3 Major Changes in the 2014 Revisions: 1) Gestational diabetes mellitus GDM screening: <ul style="list-style-type: none"> • Either the 1 or 2 step method of screening is acceptable. • 1 step screening involves a single fasted 75 gram 2 hour oral glucose tolerance test. • 2 step screening involves a non-fasted 50 gram 1 hour challenge, followed by a diagnostic fasted 3 hour 100 gram oral glucose tolerance test only for those women who exceed cutoff. 2) Medical Nutrition Therapy: <ul style="list-style-type: none"> • Published in Diabetes Care, October 2013. 			

- Focuses on overall eating patterns and patient preferences rather than a specific diet. The word “diet” is not even used in the document.

3) Expanded Section on Diabetic neuropathy:

- More detail about the various treatments and their limitations.
- Urge patients to stay on medications long enough to allow effect.
- Individualized “trial and error” approach with different drugs and drug combinations.
