

Better Care, Just for You

The Colorado Physician Partners Value-based Care Approach – Your Foundation for Health

At Colorado Physician Partners, we deliver more than just medical care, **we provide value-based care (VBC) that puts your well-being first.** Our team works together to offer coordinated, preventive primary care designed to improve the lives of adults age 65 and up. We aim to help you stay healthy so you can focus on what matters most.

What is value-based care? VBC is a way doctors take care of you by focusing on keeping you healthy, not just treating you when you're sick.

How Does Value-based Care Help You?

More Time with Your Doctor. Doctors in VBC spend more time with you to answer questions and make a plan that fits your life.

A Team That Cares. You don't just get a doctor — you get a whole team to help you with your health. This can include nurses, care managers and even someone to help with food or transportation assistance.

Fewer Trips to the Hospital. By catching problems early and checking in with you often, VBC can help you stay out of the hospital.

Extra Help at No Extra Cost. With our VBC approach, our team works together to keep you healthy and connect you with support and community resources when needed. We also coordinate care with your specialists and mental health providers — all at no extra cost to you.

How We Support You

- Same-day, walk-in and virtual video appointments
- After-hours care
- 24/7 access to your care team
- Onsite services, including labs (varies by location)
- Care coordination and personal coaching to help you live healthier, longer
- More than 100 clinicians caring for patients across 20+ locations
- A 4.9 overall Google rating¹
